SUBUNIT: Binds to the C-terminal of pp125(FAK).
ALTERNATIVE PRODUCTS: 2 isoforms; 1 (shown here) and
produced by alternative splicing.
DISEASE: A form of juvenile myelomonocytic leukemia
characterized by a chromosomal translocation t(5;11)
involves OPHNIL and MLL.
                                                                                                                                                                                                                                                                                                                                                                                                                                                      SIMILARITY: CONTAINS 1 PH DOMAIN. SIMILARITY: CONTAINS 1 RHO-GAP DOMAIN. SIMILARITY: CONTAINS 1 SH3 DOMAIN.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  family. Could activates GTP hydrolysis of members of the family. Could activates GTPase targets that are know cell migration and outgrowth of axons and dendrites. TISSUE SPECIFICITY: Expressed in brain.

DISEASE: Defects in Ophul are the cause of X-linked mental retardation (XLMR) type 60 (MRX60).

Sequence 4, Application US/09881736

Patent No. US20020076785A1

GENERAL INFORMATION:

APPLICANT: Glotzer, Michael

APPLICANT: Jantsch-Plunger, Verena

APPLICANT: Kaitna, Masanori

APPLICANT: Kaitna, Susanne

TITLE OF INVENTION: Cyk-4 polypeptides, DNA molecules encoding them and their use in

TITLE OF INVENTION: Screening methods

FILE REFERENCE: 0652.2260001/EKS/AES

CURRENT APPLICATION NUMBER: US/09/881,736

CURRENT APPLICATION NUMBER: EP 00 112 880.0

PRIOR APPLICATION NUMBER: EP 00 112 880.0

PRIOR APPLICATION NUMBER: EP 01 110 554.1

PRIOR FILING DATE: 2000-04-30

PRIOR APPLICATION NUMBER: 60/241,231

PRIOR APPLICATION NUMBER: To be determined

PRIOR FILING DATE: 2001-06-13

NUMBER OF SEQ ID NOS: 6

SOFTMARE: Patentin Ver. 2.1
